LANDING PAGE Visual Guide

Central Hub Design

Main entry point with bold branding and intuitive navigation structure

7-Module Navigation

Quick access to Sales, Order, Inventory, Delivery, Customer, Feedback & Marketing

Brand Visual Elements

Green wave patterns and fresh produce imagery reinforce grocery brand identity

Interactive UI Components

Tile-based layout for zero-training onboarding and intuitive user flow

Sales Performance

GROSS ORDER VALUE

11.01M

GROSS SALE

4.97M

PROFIT

27.4%

KEY INSIGHTS

- Sales target exceeded by 25%
- High sales ≠ high profitability
- Seasonal dependencies (growth in Mar-Apr, decline in Jun-Nov)
- Growth not driven by heavy discounting

BUSINESS IMPACT

- Effective pricing & demand validation
- Risk of pushing high-volume but low-margin products
- Management confidence in sales strategy

RECOMMENDED ACTIONS

- Increase future targets gradually
- Focus on profitable growth over volume-only growth
- Identify & promote high-margin categories
- Investigate November drop (supply/pricing/demand)

Order Analysis

TOTAL ORDERS

5K

TOTAL ITEMS

10K

AVG ITEMS/ORDER

~2

KEY INSIGHTS

- Average ~2 items per order
- Revenue depends on order volume, not basket expansion
- No single payment method dominates
- Order peaks May-October, sharp drop Nov-Dec

BUSINESS IMPACT

- Opportunity to increase revenue without acquiring new customers
- Platform not exposed to payment failure risk

RECOMMENDED ACTIONS

- Introduce bundle offers (Buy 2-Get 1)
- Promote UPI & Wallet with instant cashback
- Reduce Cash-on-Delivery to cut handling cost
- Cross-sell complementary products

Inventory Management

OPENING BALANCE

148K

CLOSING BALANCE

80K

AVAILABLE STOCK

67K

KEY INSIGHTS

- Increased procurement in 2024 indicates higher demand
- Damage rising despite better planning
- No change in available stock, every category "Below Minimum"
- Highest perishability: Fruits & Veg (0.33), Dairy & Breakfast

BUSINESS IMPACT

- Direct profit loss & capital locked without benefit
- Increased carrying cost & stock-out risk
- Higher wastage especially for perishable items

RECOMMENDED ACTIONS

- Align procurement with actual sell-through data
- Improve cold-chain & storage SOPs
- Reduce holding period for high-perishability items
- Smaller, frequent replenishment & faster dispatch

Delivery Performance

TOTAL ORDERS

5K

ON-TIME RATE

69.40%

AVG DELAY

14.49 min

KEY INSIGHTS

- On-time performance significantly below ideal benchmark (≥85%)
- Nearly 1 out of 3 orders is delayed
- Delivery status: On Time (74%), Slightly Delayed (21.6%), Significantly Delayed (4.2%)
- SLA target: 96.36% vs Actual: 79.19%

BUSINESS IMPACT

- Poor customer experience & higher complaints
- Increased refunds / compensation cost
- Negative impact on brand reputation

RECOMMENDED ACTIONS

- Introduce delivery partner performance penalties/incentives
- Implement real-time tracking & customer communication
- Optimize delivery routes & resource allocation

Customer Analysis

TOTAL CUSTOMERS

2.5K

TOTAL ORDERS

26K

TOP SEGMENT

Regular 25%

KEY INSIGHTS

- Customer base evenly distributed across segments (Regular, Premium, New, Inactive)
- New customer acquisitions declining month over month
- No clear segment dominance in quantity ordered

BUSINESS IMPACT

- Balanced segment distribution shows diversity in customer types
- Declining new customers signals weakening acquisition effort
- High inactive customer count suggests retention issues

RECOMMENDED ACTIONS

- Strengthen customer acquisition channels to reverse declining trend
- Launch re-engagement campaigns to convert inactive customers to active
- Focus on converting New → Regular → Premium segments

Customer Feedback

TOTAL FEEDBACK

5K

NEGATIVE RATE

32.8%

NEUTRAL

1.74K

KEY INSIGHTS

- Negative ratings concentrated in **Delivery**, **Customer Service**, **Product Quality**
- Positive rating trends for delivery & service, but less for product quality & app experience
- Neutral feedback dominating suggests customers are ambivalent

BUSINESS IMPACT

- High negative ratio (~33%) indicates significant dissatisfaction areas
- May impact customer retention & brand trust
- Negative sentiment in core areas can erode repeat purchases

RECOMMENDED ACTIONS

- Delivery:** Refine logistics, communicate updates, reduce delays
- Customer Service:** Train support teams, reduce response times
- Product Quality:** Investigate complaints, identify defects or mismatches

Marketing Analysis

TOTAL IMPRESSIONS

29M

CONVERSION RATE

10.0%

ROAS

14.80K

KEY INSIGHTS

- Healthy conversion rate (10%) indicates **relevant targeting**
- Revenue outperforms spend (₹32.19M vs ₹16.32M) → **efficient ROI**
- Top campaigns drive clicks evenly, **no single campaign dominates**
- Channel imbalance: App & Email outperform SMS & Social Media

BUSINESS IMPACT

- Marketing is **profitable and scalable** (positive ROAS)
- Seasonal dips can impact quarterly targets if not planned
- Marketing investments are profitable and sustainable

RECOMMENDED ACTIONS

- Reallocate budget towards high-ROI channels (App & Email)
- Shift budget from low-ROI channels (SMS, Social) to App & Email
- Plan seasonal campaigns to mitigate mid-year dips

Strategic Insights & Business Impact

Data-driven insights powering operational excellence and strategic decision-making

Sales Performance

+25% Target

Sales target exceeded with 27.4% profit margin. Focus on profitable growth over volume-only expansion.

Order Analysis

~2 Items/Order

Bundle offers opportunity. Promote UPI/Wallet with cashback, reduce Cash-on-Delivery.

Inventory Management

High Perishability

Align procurement with sell-through. Improve cold-chain & storage for Fruits & Veg, Dairy items.

Delivery Performance

Below 85%

On-time rate significantly below benchmark. Introduce delivery partner penalties/incentives.

Customer Analysis

Declining Acquisition

New customer acquisitions declining. Strengthen channels and launch re-engagement campaigns.

Marketing ROI

10% Conversion

Profitable ROI with 14.80K ROAS. Reallocate budget from SMS/Social to App & Email channels.

KEY INSIGHT: Data-driven strategy optimization is critical for sustained growth
